The charts compare salaries as a percentage of operating revenues.

Delta Pilots rank near industry top while Delta Flight Attendants rank near industry bottom. Worse, both Rumor Has It and IFS 360 said, "if operating income were a valid standard, then Delta Pilots would be at, or near, the bottom."

Let's say that we shared the Number 3 rank with Pilots, putting us along side of Flight Attendants at American Airlines who earn 3.2% of their company's operating revenue. Our annual base salary would rise by well over \$10,000.00 a year. With a Working Agreement we can change this. Sign your card today!
